## Installation

- Install the faucet with the assistance of a qualified, licenced technician. These services are provided at extra cost.
- Make sure that the pressure control valve and the anti-calciferous filter are mounted in the system of water supply.
- Otherwise, mount the required components on the water supply system, before you continue to install the mixing faucet.
- Regulate the valve for the reduction of pressure.
- Carefully wash the junctions.
- Put the rubber packing on the bottom of the mixer tap.
- Position the mixing faucet, place the rubber section the on the mixing faucet body. Screw the threading rod, then mount the washer. After that, fasten the mixing faucet with a screw.
- Screw the flexible hose in the reception part of the mixing faucet, to ensure air tightness.
- With the help of the nut, connect the faucet to the connection of the hot and cold water supply system

## Service and Maintenance Instructions

In order to proceed to maintenance for long and comfortable operation of the acquired item we recommend that you should:

1. install/maintain the faucet with the assistance of a qualified, licenced technician. These services are provided at extra cost.
2. follow the instructions while installing.
3. use the filter of water purification with purification efficiency no more than 315 micron.
4. periodically wipe the faucet with a cloth wetted in soapsuds and then clean it with a dry soft fabric. It is expressly forbidden to use acidiferous, chlorine - containing and abrasive cleaning fluids.
5. Remove salt regularly by removing the components and placing them in a water-vinegar solution for one hour. Then rinse them with water and replace them.

\* The manufacturer reserves the right to make minor changes to product design and technical specifications without prior notice unless these changes significantly affect the performance and safety of the products. The parts described / illustrated in the pages of the manual that you hold in your hands may also concern other models of the manufacturer's product line with similar features and may not be included in the product you just acquired.

\* To ensure the safety and reliability of the product and the warranty validity, all repair, inspection, repair or replacement work, including maintenance and special adjustments, must only be carried out by technicians of the authorized service department of the manufacturer.

\* Always use the product with the supplied equipment. Operation of the product with non-provided equipment may cause malfunctions or even serious injury or death. The manufacturer and the importer shall not be liable for injuries and damages resulting from the use of non-conforming equipment.

## Installation

- Installez le robinet avec l'aide d'un technicien qualifié et agréé. Ces services sont fournis moyennant un coût supplémentaire.
- Assurez-vous que la vanne de régulation de pression et le filtre anti-calcaire sont montés dans le système d'alimentation en eau.
- Sinon, montez les composants requis sur le système d'alimentation en eau, avant de poursuivre l'installation du robinet mélangeur.
- Réglez la vanne de réduction de la pression.
- Lavez soigneusement les jonctions.
- Placez la garniture en caoutchouc sur le fond du robinet mélangeur.
- Positionnez le robinet mélangeur, placez la section en caoutchouc sur le corps du robinet mélangeur. Vissez la tige filetée, puis montez la rondelle. Ensuite, fixez le robinet mélangeur avec une vis.
- Vissez le tuyau flexible dans la partie réception du robinet mélangeur, pour assurer l'étanchéité.
- À l'aide de l'écrou, raccordez le robinet au raccordement du système d'alimentation en eau chaude et froide.

## Entretien

Afin de procéder à l'entretien pour un fonctionnement durable et confortable de l'objet acquis, nous vous recommandons de :

1. d'installer/entretenir le robinet avec l'assistance d'un technicien qualifié et agréé. Ces services sont fournis moyennant un coût supplémentaire.
2. de suivre les instructions lors de l'installation.
3. utiliser le filtre de purification d'eau dont l'efficacité de purification ne dépasse pas 315 microns.
4. essuyez périodiquement le robinet avec un chiffon imbibé de savon et nettoyez-le ensuite avec un tissu doux et sec. Il est expressément interdit d'utiliser des liquides de nettoyage acidifiants, contenant du chlore et abrasifs.
5. Retirez régulièrement le sel en enlevant les composants et en les plaçant dans une solution eau-vinaigre pendant une heure. Rincez-les ensuite à l'eau et remettez-les en place.

\* Le fabricant se réserve le droit d'apporter des modifications mineures à la conception et aux spécifications techniques des produits sans préavis, à moins que ces modifications n'affectent de manière significative les performances et la sécurité des produits. Les pièces décrites / illustrées dans les pages du manuel que vous tenez entre vos mains peuvent également concerner d'autres modèles de la gamme de produits du fabricant présentant des caractéristiques similaires et peuvent ne pas être incluses dans le produit que vous venez d'acquérir.

\* Pour garantir la sécurité et la fiabilité du produit et la validité de la garantie, tous les travaux de réparation, d'inspection, de réparation ou de remplacement, y compris l'entretien et les réglages spéciaux, doivent être effectués uniquement par des techniciens du service après-vente agréé du fabricant.

\* Utilisez toujours le produit avec l'équipement fourni. L'utilisation du produit avec un équipement non fourni peut entraîner des dysfonctionnements, voire des blessures graves ou la mort. Le fabricant et l'importateur ne sont pas responsables des blessures et des dommages résultant de l'utilisation d'un équipement non conforme.

## Installazione

- Installi il rubinetto con l'assistenza di un tecnico qualificato e abilitato. Questi servizi sono forniti a un costo aggiuntivo.
- Si assicuri che la valvola di controllo della pressione e il filtro anti-calcare siano montati nel sistema di alimentazione idrica.
- Altrimenti, monti i componenti necessari sulla rete idrica, prima di continuare a installare il rubinetto miscelatore.
- Regoli la valvola per la riduzione della pressione.
- Lavare accuratamente le giunzioni.
- Metta la guarnizione di gomma sul fondo del miscelatore.
- Posizionare il rubinetto miscelatore, collocare la sezione in gomma sul corpo del rubinetto miscelatore. Avviti l'asta di filettatura, quindi monti la rondella. Dopodiché, fissi il rubinetto miscelatore con una vite.
- Avviti il tubo flessibile nella parte di ricezione del rubinetto miscelatore, per garantire la tenuta d'aria.
- Con l'aiuto del dado, colleghi il rubinetto alla connessione del sistema di alimentazione dell'acqua calda e fredda.

## Manutenzione

Al fine di procedere alla manutenzione per un funzionamento lungo e confortevole dell'articolo acquistato, le consigliamo di:

1. installare/manutenere il rubinetto con l'assistenza di un tecnico qualificato e abilitato. Questi servizi sono forniti a un costo aggiuntivo.
2. seguire le istruzioni durante l'installazione.
3. utilizzare il filtro di purificazione dell'acqua con un'efficienza di purificazione non superiore a 315 micron.
4. pulisca periodicamente il rubinetto con un panno bagnato di sapone e poi lo pulisca con un tessuto morbido e asciutto. È espressamente vietato l'uso di detergenti acidi, contenenti cloro e abrasivi.
5. Rimuova regolarmente il sale rimuovendo i componenti e mettendoli in una soluzione di acqua e aceto per un'ora. Poi li sciacqui con acqua e li rimetta.

\* Il produttore si riserva il diritto di apportare piccole modifiche al design del prodotto e alle specifiche tecniche senza preavviso, a meno che tali modifiche non influiscano significativamente sulle prestazioni e sulla sicurezza dei prodotti. Le parti descritte/illustrate nelle pagine del manuale che tiene tra le mani possono riguardare anche altri modelli della linea di prodotti del produttore con caratteristiche simili e potrebbero non essere incluse nel prodotto appena acquistato.

\* Per garantire la sicurezza e l'affidabilità del prodotto e la validità della garanzia, tutti i lavori di riparazione, ispezione, riparazione o sostituzione, compresa la manutenzione e le regolazioni speciali, devono essere eseguiti esclusivamente da tecnici del servizio di assistenza autorizzato del produttore.

\* Utilizzare sempre il prodotto con l'apparecchiatura fornita. L'utilizzo del prodotto con apparecchiature non fornite può causare malfunzionamenti o addirittura lesioni gravi o morte. Il produttore e l'importatore non sono responsabili per le lesioni e i danni derivanti dall'uso di apparecchiature non conformi.

## Εγκατάσταση/Τοποθέτηση

- Η εγκατάσταση της αναμεικτικής μπαταρίας κουζίνας πρέπει να πραγματοποιηθεί μόνο από έναν εξειδικευμένο επαγγελματία, ο οποίος κατέχει και την ανάλογη άδεια άσκησης επαγγέλματος.
- Βεβαιωθείτε ότι η βαλβίδα ελέγχου πίεσης και το φίλτρο κατά των αλάτων είναι τοποθετημένα στο σύστημα εισαγωγής νερού. Διαφορετικά, τοποθετήστε τα απαραίτητα εξαρτήματα στο σύστημα παροχής νερού προτού συνεχίσετε με την τοποθέτηση της βρύσης.
- Ρυθμίστε τη βαλβίδα για τη μείωση της πίεσης.
- Πλύνετε προσεκτικά τους συνδέσμους.
- Τοποθετήστε το λάστιχο στο κάτω μέρος της βρύσης.
- Τοποθετήστε τη βρύση, τοποθετήστε το λάστιχο στον κορμό της βρύσης. Βιδώστε το τμήμα με το σπείρωμα, στη συνέχεια τοποθετήστε τη ροδέλα. Στη συνέχεια, σταθεροποιήστε τη βρύση χρησιμοποιώντας μια βίδα.
- Βιδώστε καλά τον εύκαμπτο σωλήνα στην υποδοχή της βρύσης, για να εξασφαλίσετε στεγανότητα.
- Με τη βοήθεια του παξιμαδιού του σωλήνα συνδέστε τη βρύση με την υποδοχή του συστήματος παροχής νερού ζεστού και κρύου νερού.

## Οδηγίες Συντήρησης

Για την επίτευξη της βέλτιστης απόδοσης και της μέγιστης διάρκειας χρόνου ζωής παρακαλούμε να ακολουθήσετε τις παρακάτω οδηγίες:

1. Η εγκατάσταση/τοποθέτηση των προϊόντων πρέπει να πραγματοποιηθεί μόνο από έναν εξειδικευμένο επαγγελματία, ο οποίος κατέχει την ανάλογη άδεια άσκησης επαγγέλματος, όπως ήδη αναφέρθηκε. Η εγκατάσταση / τοποθέτηση των προϊόντων φέρουν επιπλέον κόστος.
2. Ακολουθήστε τις οδηγίες για την συντήρηση των αναμεικτικών μπαταριών.
3. Χρησιμοποιήστε ένα φίλτρο καθαρισμού νερού από υπολείμματα με ακρίβεια διήθησης 315 micron.
4. Για να διατηρήσετε το φινίρισμα και την λάμψη στα εξαρτήματα, συνιστάται περιοδικά να τα σκουπίζετε με ύφασμα βρεγμένο με σαπούνι και στη συνέχεια να τα καθαρίζετε με ένα στεγνό και μαλακό ύφασμα. Είναι ρητά απαγορευμένη η χρήση υγρών καθαρισμού που περιέχουν όξινα, χλωριούχα και διαβρωτικά καθαριστικά.
5. Αφαιρείτε τα άλατα τακτικά αφαιρώντας τα εξαρτήματα και τοποθετώντας τα σε ένα διάλυμα νερού - ξυδιού για μία ώρα. Έπειτα ξεπλύνετε τα με νερό και επανατοποθετήστε τα.

\*Ο κατασκευαστής διατηρεί το δικαίωμα να πραγματοποιήσει δευτερεύουσες αλλαγές στο σχεδιασμό του προϊόντος και στα τεχνικά χαρακτηριστικά χωρίς προηγούμενη ειδοποίηση, εκτός εάν οι αλλαγές αυτές επηρεάζουν σημαντικά την απόδοση και λειτουργία ασφάλειας των προϊόντων. Τα εξαρτήματα που περιγράφονται / απεικονίζονται στις σελίδες του εγχειριδίου που κρατάτε στα χέρια σας ενδέχεται να αφορούν και σε άλλα μοντέλα της σειράς προϊόντων του κατασκευαστή, με παρόμοια χαρακτηριστικά, και ενδέχεται να μην περιλαμβάνονται στο προϊόν που μόλις αποκτήσατε.

\* Για να διασφαλιστεί η ασφάλεια και η αξιοπιστία του προϊόντος καθώς και η ισχύς της εγγύησης όλες οι εργασίες επιδιόρθωσης, ελέγχου, επισκευής ή αντικατάστασης συμπεριλαμβανομένης της συντήρησης και των ειδικών ρυθμίσεων, πρέπει να εκτελούνται μόνο από τεχνικούς του εξουσιοδοτημένου τμήματος Service του κατασκευαστή.

\* Χρησιμοποιείτε πάντα το προϊόν με τον παρεχόμενο εξοπλισμό. Η λειτουργία του προϊόντος με μη-προβλεπόμενο εξοπλισμό ενδέχεται να προκαλέσει βλάβη ή ακόμα και σοβαρό τραυματισμό ή θάνατο. Ο κατασκευαστής και ο εισαγωγέας ουδεμία ευθύνη φέρει για τραυματισμούς και βλάβες που προκύπτουν από την χρήση μη προβλεπόμενου εξοπλισμού.

## Installation

- Install the faucet with the assistance of a qualified, licenced technician. These services are provided at extra cost.
- Make sure that the pressure control valve and the anti-calciferous filter are mounted in the system of water supply.
- Otherwise, mount the required components on the water supply system, before you continue to install the mixing faucet.
- Regulate the valve for the reduction of pressure.
- Carefully wash the junctions.
- Put the rubber packing on the bottom of the mixer tap.
- Position the mixing faucet, place the rubber section the on the mixing faucet body. Screw the threading rod, then mount the washer. After that, fasten the mixing faucet with a screw.
- Screw the flexible hose in the reception part of the mixing faucet, to ensure air tightness.
- With the help of the nut, connect the faucet to the connection of the hot and cold water supply system

## Service and Maintenance Instructions

In order to proceed to maintenance for long and comfortable operation of the acquired item we recommend that you should:

1. install/maintain the faucet with the assistance of a qualified, licenced technician. These services are provided at extra cost.
2. follow the instructions while installing.
3. use the filter of water purification with purification efficiency no more than 315 micron.
4. periodically wipe the faucet with a cloth wetted in soapsuds and then clean it with a dry soft fabric. It is expressly forbidden to use acidiferous, chlorine - containing and abrasive cleaning fluids.
5. Remove salt regularly by removing the components and placing them in a water-vinegar solution for one hour. Then rinse them with water and replace them.

\* The manufacturer reserves the right to make minor changes to product design and technical specifications without prior notice unless these changes significantly affect the performance and safety of the products. The parts described / illustrated in the pages of the manual that you hold in your hands may also concern other models of the manufacturer's product line with similar features and may not be included in the product you just acquired.

\* To ensure the safety and reliability of the product and the warranty validity, all repair, inspection, repair or replacement work, including maintenance and special adjustments, must only be carried out by technicians of the authorized service department of the manufacturer.

\* Always use the product with the supplied equipment. Operation of the product with non-provided equipment may cause malfunctions or even serious injury or death. The manufacturer and the importer shall not be liable for injuries and damages resulting from the use of non-conforming equipment.
